

42.5" Primary Control Monitor

Raptor® RP4325

4K2K

## Optimal Use

### 4K × 2K High Resolution

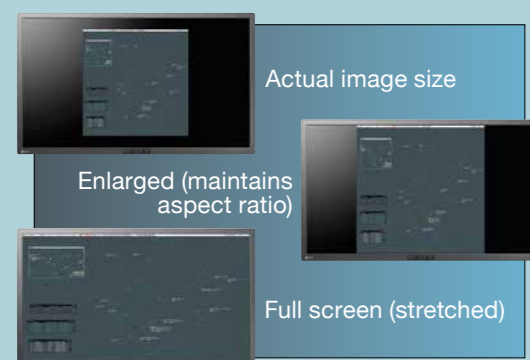

Display 4K × 2K high-resolution data in full on one screen without the obtrusive bezels typically found in a multi-monitor workstation. 2K × 2K and auxiliary information can also be displayed simultaneously on a single screen, allowing controllers to view more information easily in one place.

### Simultaneous Input Signals

The Raptor RP4325 can display input from up to four video sources simultaneously. Users can freely position each screen for a highly customizable layout.

### Resolution Scaling

The Raptor RP4325 supports resolution scaling for each of its video inputs. Any non-native resolution can be displayed in its actual size, scaled proportionately, or expanded to fill the screen.

### Wide Brightness Range

The monitor can be adjusted within a wide brightness range of 25 to 500 cd/m<sup>2</sup> to suit your environment as well as the needs of the ATCO.

## Design

### Slim Bezels

The unobtrusive bezels measure just 24 mm on the sides so ATCOs can focus more on the screen.

### Rounded Corners

The monitor's design features rounded corners and edges for a pleasing and modern aesthetic.

### Balanced Design

The monitor's depth is designed to be minimal to bring the weight distribution close to the center of mass. This lowers stress on mounting fixtures over time. It weighs just 20.5 kg in consideration of the installation environment.

### Screen Customizations

Protection glass is optional and covers the visible part of the LCD panel for increased reliability. Optional optical bonding is also available for increased visibility and durability.

### Mounting Flexibility

The monitor supports VESA mounting for conveniently installing in open or closed ATC consoles. A desktop version with a stand is also available as an option.

## Durability and Reliability

### Industrial-Grade Housing

The monitor's housing uses full sheet steel industrial-grade housing for durability in demanding environments.

### Fanless Operation

The monitor provides noiseless, fanless operation while still maintaining low heat output for reliability.

### Built-In Power Supply

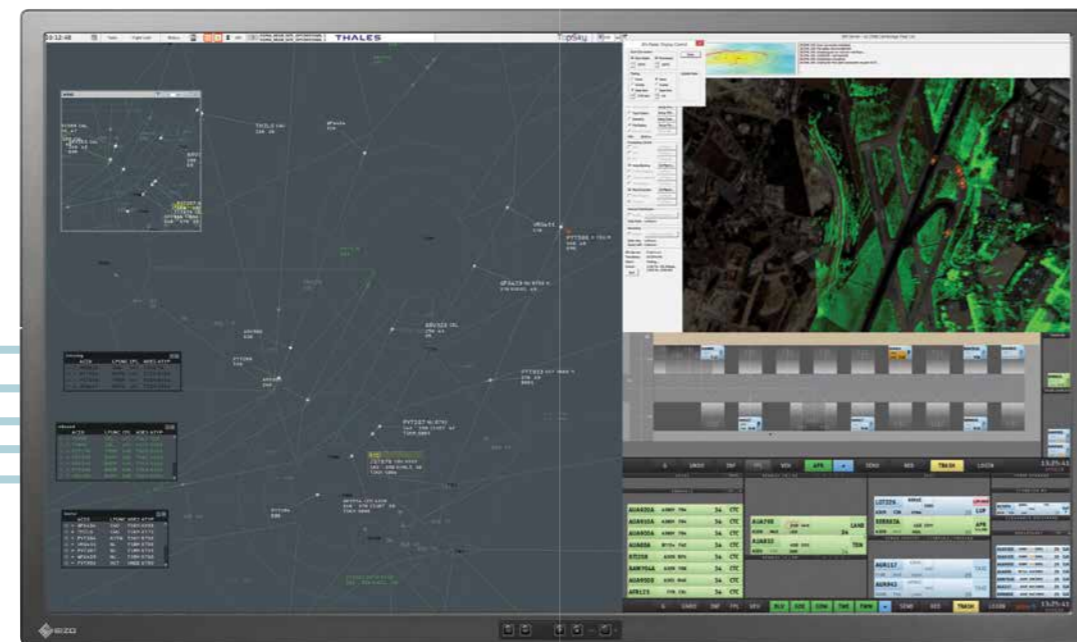

While other solutions may require a bulky power brick to operate, the Raptor RP4325 has its power supply built in. This provides a cleaner and more manageable installation area. A secondary built-in power supply is available as an option.

### 24/7 Operation

The Raptor RP4325 is developed specifically for meeting the stringent requirements of mission-critical ATC environments with 24/7 operation.

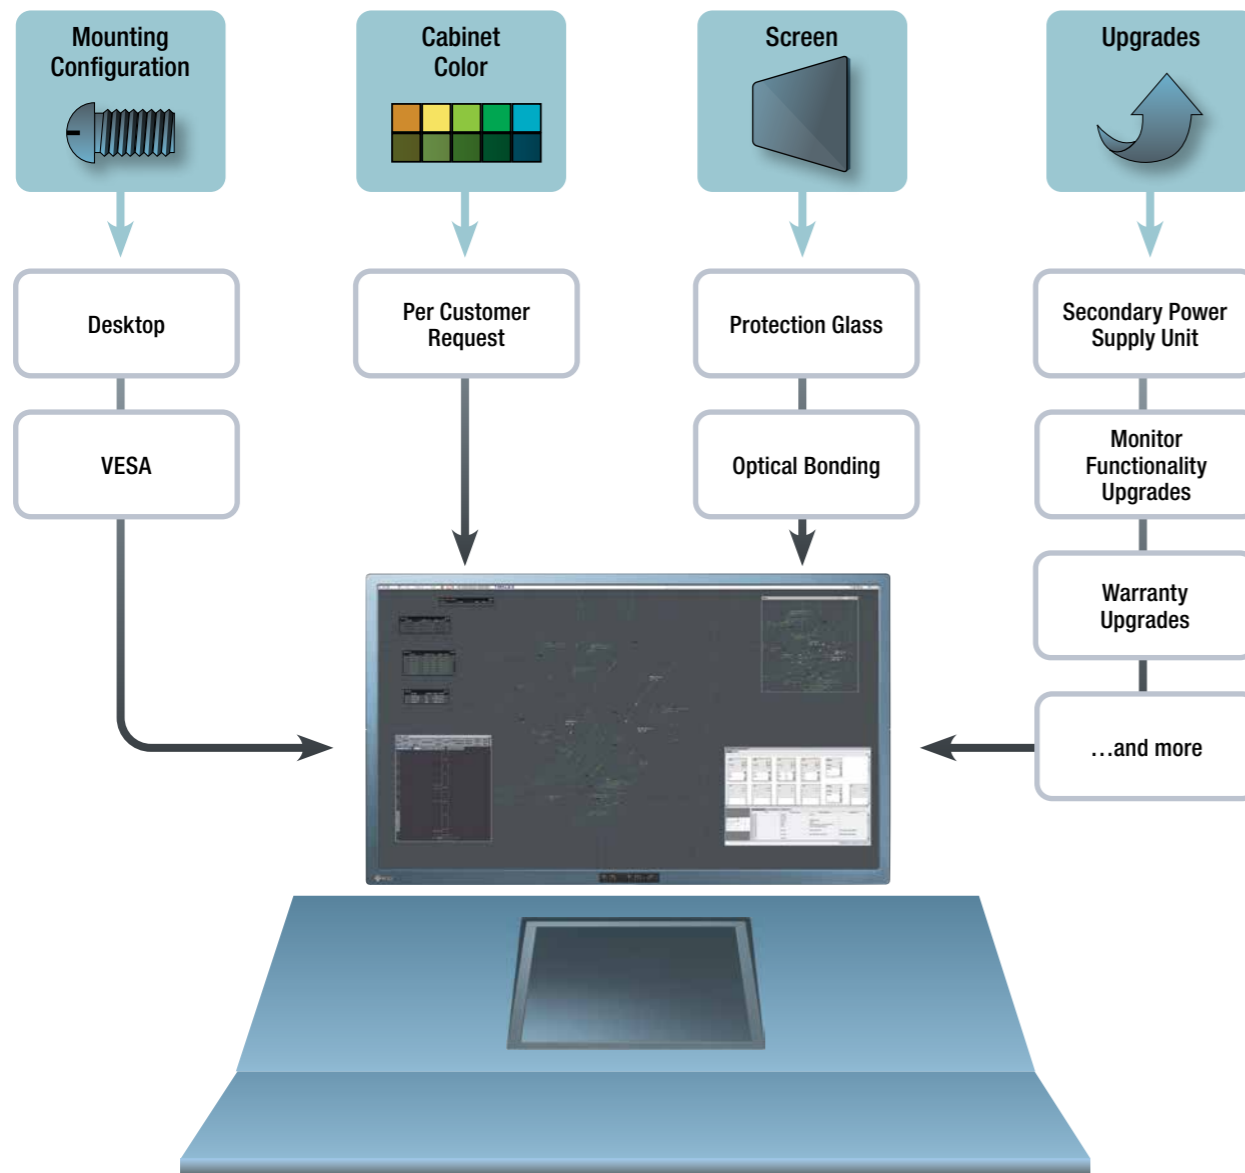

## 15 Years of Primary Control Monitor Manufacturing

EIZO has been an industry leader in the innovation and development of quality 2K primary control monitors for ATC since 2005. Backed by over 50 years of technical expertise in visual display solutions, the Raptor RP4325 is the industry's first 4K x 2K monitor developed specifically for ATC. It combines the features of EIZO's line of primary control monitors while adding further value with 4K resolution, unique functionality, and operational reliability.

## Extensive Customization

EIZO offers extensive customization in order to meet the specific needs of individual control centers.

### Energy Efficiency

The monitor consumes up to just 125 watts at maximum brightness (500 cd/m<sup>2</sup>) and even less than that under typical operating conditions in control rooms. This saves energy and significantly reduces heat generation within the monitor, a leading cause of component failure.

### Complete Connection

The monitor is equipped with two dual link DVI video signal inputs and two DisplayPort 1.2 inputs. It also comes equipped with a wide range of communication interfaces for connection to a network, remote monitor management, or maintenance purposes — RS232, USB, and TCP/IP.

### Non-Intrusive Hardware Calibration

The monitor comes equipped with EIZO's hardware calibration functionality using an external luminance reader. Easily accessed through the OSD menu, calibration of the backlight brightness, gamma, and white point can be carried out in just minutes. No additional software is needed, ensuring calibration operation is non-intrusive to your system.

### Optional Accessories

#### EACON-S01

External OSD keyboard for control of a single monitor.

### Specifications

Panel	Type	VA
	Backlight	Edge-type LED backlight system
	Size	42.5" / 108 cm
	Native Resolution	3840 x 2160 (16:9 aspect ratio)
	Viewable Image Size (H x V)	941.2 x 529.4 mm
	Pixel Pitch	0.245 x 0.245 mm
	Display Colors	16.77 million
	Viewing Angles (H x V, typical)	178°, 178°
	Brightness (typical)	25 – 500 cd/m <sup>2</sup>
	Contrast Ratio (typical)	4000:1
Video Signals	Response Time (typical)	8 ms (gray-to-gray)
	Input Terminals	DVI (dual-link) x 2 DisplayPort x 2
USB	Digital Scanning Frequency (H / V)	260 MHz (2 x 130 MHz dual link) / 60 Hz
	Upstream	USB 2.0: Type-B
Power	Downstream	USB 2.0: Type-A x 2
	Power Requirements	AC 100 – 240 V, 50 – 60 Hz
	Maximum Power Consumption*	100 – 125 W (Brightness: 500 cd/m <sup>2</sup> )
	Typical Power Consumption*	50 – 70 W (Brightness: 150 cd/m <sup>2</sup> )
Features and Functions	Standby Mode	10 W or less
	Brightness Stabilization	Yes
	Communication Protocol	SNMP, HTTP, HID, Modbus/TCP
Physical Specifications	Communication Interface	RS-232C, USB, RJ-45
	Dimensions (With Stand, W x H x D)	992 x 613 – 673 x 322.9 mm
	Dimensions (Without Stand, W x H x D)	992 x 588 x 93.4 mm
	Net Weight (With Stand)	26.2 kg
	Net Weight (VESA Mount)	20.5 kg
	Tilt	25° Up, 0° Down
	Swivel	172° Right, 172° Left
Hole Spacing (VESA Standard)	400 x 200 mm	
Environmental Requirements	Operating Temperature	0 – 40°C
	Operating Humidity (R.H., non condensing)	max. 90%
	Storage Temperature	-20 – 60°C
Certifications & Standards	CE, UL, c-UL, FCC, REACH, RoHS, WEEE	
Warranty	Two Years	

\*Actual power consumption depends on active monitor functions.
